Tracking plot usage and costs has never been an easy or accurate thing to do. Plot Minder changes all that! Plot Minder delivers unparalleled ease of use and accuracy for capturing AutoCAD plots. Now every plot can be recorded for billing purposes and media usage. With the Plot Minder Client, AutoCAD users will hardly notice that anything is different. Valuable information such as job number, drawing name, plot area (requested or effective), user name, date & time, copies, and cost will be automatically captured. CAD administrators can now have this valuable information at their finger tips. With Plot Minder Viewer, data can be presented in just about any way a company wishes. Plot Minder comes with 9 standard reports, and an unlimited number of "filtered" reports. And if that still isn't enough, we have provided "hooks" into the plot data to allow you to produce your own custom reports. From now on, billing your clients will be painless and accurate.

Job #	Plotter	Area Factor	Drawing Name	User	Units	Effect. Width	Effect. Height	Width	Height	Plot Date & Time	Plot Media	Plot Type	Copy	Cost / Sq. Ft.	Billable	Comment	To File
