

CAD fx Announces DeltaPDF 3.0 for PDF Comparisons

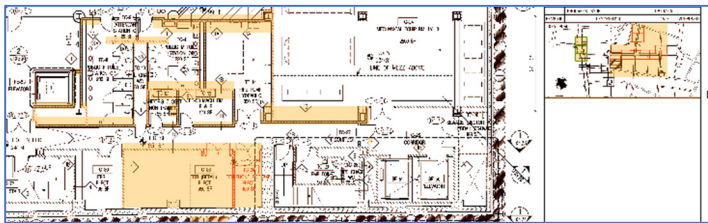

May 22, 2018 – CAD fx, Inc. announces DeltaPDF version 3, a PDF comparison tool to help architects and engineers more efficiently identify differences in their designs.

Some key benefits of the original DeltaPDF are:

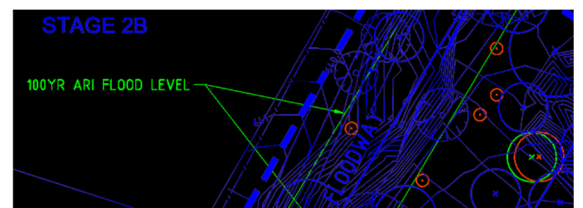

- Quickly identify differences using easy-to-see colors
- Batch process pairs of PDF files between two folders or two multi-page PDF files
- Generates comparisons in on-screen viewer or to file

Exciting new features in Version 3!

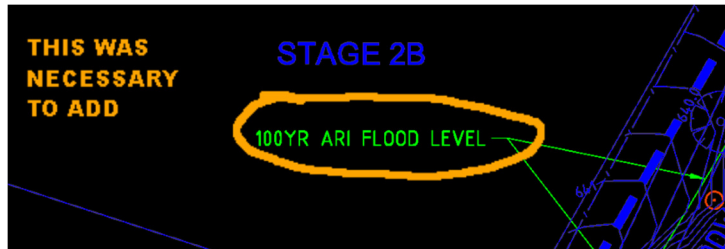

Areas of difference automatically highlighted:

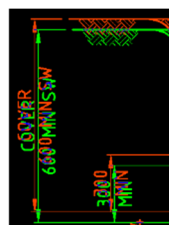

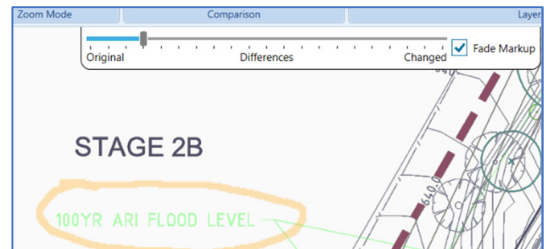

Invert background color for better contrast:

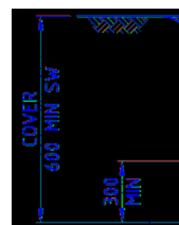

Markup capabilities:

Slide between original & changed:

Fix moved objects:

“With the addition of inverted backgrounds, PDF layers and markup capabilities, DeltaPDF takes PDF comparison to another level” according to Matt Pearson, President of CAD fx. DeltaPDF is available as a single-user license for \$250 or \$995 for an unlimited network license or \$1750 for the command-line version. A free trial and more information is available at: www.cadfx.com/deltapdf.html
